## C2_W1 Quiz

Statistical analysis is a core capability of spreadsheets.

Of these file types, only .xlsx files can be opened in Excel.

The Font, Alignment, Number and Styles groups are located on the Home tab in the Excel ribbon.

Excel worksheet cells are referenced by column letter first then row number,

for example: A2 or H12

You can use this shortcut to find how many rows of data you have in a worksheet. Assuming you have no empty rows in your data,

- CTRL+End takes you to the very last data cell in a worksheet
- CTRL+Down takes you to the bottom of the current column in a worksheet
